Brooklawn Dental Health Center has been putting smiles on greater New Bedford's faces for four generations

Doctors Stanley Walsh Jr., DDS FAGD, Christopher L. Marco, DMD, and Aaron C. Campini, DMD.
Brooklawn Dental Health Center located at 559 Ashley Boulevard has been taking care of all of greater New Bedford's dental needs since 1961. From general dental care like check-ups, to a child's first visit, restorative and cosmetic procedures, as well as preventative ones.

Doctors Stanley Walsh Jr., DDS FAGD, Christopher L. Marco, DMD, and Aaron C. Campini, DMD are accompanied by a staff of 15 team members – all of whom have been with the doctors and the dental center for at least 9 years. That means a high level of contentment and synergy which translates to a safe, superlative experience from friendly, high level professionals.

Always a warm welcome from the ever-friendly Tracy and Sandy!

Since the staff has been treating patients for four

generations that means that these faces are mainly familiar ones. They know you by name, they know your history, and your concerns. The longevity of the dental center speaks volumes for the quality of care they provide. If that doesn’t “speak” loud enough the glowing testimonials will!

When it comes to specific services offered, the state of the art facility offers regular dental care, restorations, such as crowns, bridges, and implants, dentures, cosmetic procedures for teeth whitening and veneers.

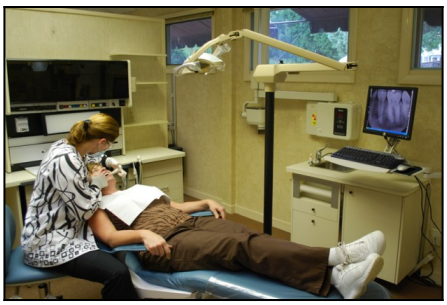

Technologies include digital radiography, state of the art sterilization, and intraoral and extraoral digital photography. These all lead to a more comfortable, less invasive experience. One of the very popular pieces of technology that they utilize is the Wand-Painless Injections. Yes, just like it sounds it is an unnoticeable injection of anesthesia. Amazing how far technology has come!

One technology that they are particularly proud of is the use of the Planmeca CAD/CAM 3 D Dentistry device. This is cutting edge stuff. What this technology does is give you same day delivery of a crown or veneer in as little as 2 hours. Digital based means, that instead of having a conventional impression made with its horrible taste and gooey gum tray, you get computer precision in 3D.

How it works is that each tooth is scanned to the finest detail, then the digital image is sent to their state-of-the-art milling unit on site. The final result is a natural looking restoration that beautifully fits the surrounding teeth, making the crown or veneer virtually undetectable. The elimination of impressions, temporaries, second appointments, and waiting for the permanent crown revolutionizes the entire dental experience for both the dentist and the patient.

Brooklawn Dental Health Center takes care of patients in other ways: records are electronic making sharing and pulling up of information speedy, nine treatment rooms (which are computerized and networked), free high speed internet access, and even an iPad for patient education. In addition, they offer digital impressions and crowns done in **one** visit, whereas prior to this it took two visits.

The Doctors at Brooklawn Dental utilize Wand-Painless Injections for those of you who have a sensitive mouth.

Because the staff has us in mind and we have busy schedules, they are open as early as 7:00am most days and Wednesday evenings until 7:30pm. You can even request an appointment on their website, Facebook, or email. All those links are provided below. Gone are the days when there were phone call reminders: now they can call, email, text or remind you on social media that your appointment is imminent.

Whether you need regular dental care or have something more serious to take care of, you would be hard pressed to find a more experienced, friendly, dedicated group of professionals than those at Brooklawn Dental. They are accepting new clients, but there is no telling how long that will last. Make an appointment today and get on the path to a healthier new smiling you!
