Psychiatric Registered Nurses: Part time and full time all shifts also RN for every weekend; all shifts available

Our nurses provide general nursing care to patients in a hospital setting. This position provides, delegates, coordinates and evaluates patient care through the collaborative efforts of health team members and in accordance with the nursing process and standards of care and practice. You will provide a key role in the implementation of milieu management and therapeutic interaction. You will have the ability to apply psychiatric and medical nursing procedures and practices to psychiatric and personality disorders and to work with geriatric, adolescent, and adult populations as demonstrated through education accomplishment or work

experience.

Psychiatric Intake and Admissions Nurse – RN: Every weekend overnights

As a member our Admissions Staff, you will receive and respond to call inquiries for potential admissions for acute care and obtain the required information to facilitate admissions. You will be responsible for intake/nursing assessments.

LPNs – All Shifts including weekends

You will provide general nursing care to patients in an acute hospital, coordinating patient care under the direct supervision of a Registered Nurse. You will provide a key role in the implementation of milieu management and therapeutic interaction and distribute medications to patients.

You will need the ability to apply psychiatric and medical nursing procedures and practices to psychiatric and personality disorders and to work with geriatric, adolescent, and adult populations as demonstrated through educational accomplishment or work experience. You must demonstrate a strong interest in providing therapeutic care for patients with mental illness and or behavioral disorders.

Part-Time Weekend Rounding Nurse Practitioner

As an Advanced Practice Nurse, you will be a member of the multidisciplinary team with expertise in the assessment, diagnosis, and treatment of individuals and/or families response to actual or potential mental health problems. We are looking for an expert clinician who delivers direct care, including pharmacologic and non-pharmacologic treatment of mental health problems.

Per Diem Case Manager – LCSW, LICSW or LMHC Required

Our Case Managers are responsible for providing quality care to adolescent, adult and geriatric patients, and their

families and guardians throughout the patients' episode of care. Quality care includes, but is not limited to the following: performing psychosocial assessments, participating in multi-disciplinary rounds and treatment planning meetings, providing care coordination, organizing individual/family/systems meetings, facilitating clinical process groups, managing the discharge and continued care planning process and documenting all patient encounters.
