

# ISS executes Massachusetts flyover and shares stellar view from space!

The International Space Station flew over Massachusetts Sunday afternoon and shared a video of the view! They took the scenic route from Boston, through Plymouth, to Cape Cod and judging by only one cloud in the sky it was a beautiful day to fly over.

The flight path is photographed below, as you can see New Bedford just barely didn't make it on camera. Maybe next time around they can come say high to the South Coast!
