

New Bedford airport adds tracked vehicle to clear vegetation and debris

From the New Bedford Regional Airport:

“The New Bedford Regional Airport is proud to announce the newest addition to it’s fleet!

The Marsh Master by Coastal Machinery is a fully amphibious, track driven vehicle, purpose-built to aid Airport personnel with clearing vegetation and debris in Wetland Safety Areas.

FLY LOCAL. FLY EWB.”

Here’s a look at the Marsh Master at work from Coastal Machinery’s promotional video:
