

# New Bedford Fire Department converts emergency breathing apparatus

“Massachusetts’s New Bedford Fire Department converts their emergency breathing apparatus to the MSA G1 SCBA!!

A two-year evaluation process between multiple brands led the department to the function, comfort, and durability that only the G1 could offer. We thank all members of NBFD for their time and effort during this process.

Congratulations and thanks for your faith in Firematic and MSA. We’ve got your back! For more on the Revolutionary G1, visit [https://firematic.com/msa\\_g1scba.htm](https://firematic.com/msa_g1scba.htm)
